

```
public class Adaptador extends Shape {  
  
    RasterBox rasterBox = new RasterBox();  
  
    public int getX() { return rasterBox.getBottomRight().x; }  
  
    public int getY() { return rasterBox.getBottomRight().y; }  
  
    public int getHeight() { return rasterBox.getTopLeft().x; }  
  
    public int getWidth() { return rasterBox.getTopLeft().y; }  
  
}
```
